**REMARKS/ARGUMENTS**

Based on 35 U.S.C. 121, the Examiner determined that restriction to one of the following inventions is required:

- I. Claims 1-15, drawn to a locking system, classified in class 403, subclass 326; and
- II. Claims 16-19, drawn to a method of using a locking system, classified in class 29, subclass 428.

Applicant elects to prosecute claims 1-5 and cancels claims 16-19 without prejudice.

No amendment made was related to the statutory requirements of patentability unless expressly stated herein. No amendment made was for the purpose of narrowing the scope of any claim, unless Applicants have argued herein that such amendment was made to distinguish over a particular reference or combination of references.

In the event that the Examiner deems the present application non-allowable, it is requested that the Examiner telephone the Applicants' attorney or agent at the number indicated below so that the prosecution of the present case may be advanced by the clarification of any continuing rejection.
